Owner of *IT Support RI*

With summer coming to a close, things are starting to slow down. Enjoy these lazy summer days because they'll be gone before you know it. We've included some **sunglasses to help keep the sun out of your eyes and the focus on your business.**

Take advantage of the summertime and **get a head start on some IT projects** before things ramp up in the fall! You already know that our **spec-tacular** technicians and account managers are ready to help you with any IT projects!

Hacking a business today is easier than it has ever been. With nearly every company in America now intimately intertwined with technology, you might think cyber security would be a priority. But the truth is, our protective measures have grown lax, as organizations fall behind the times in their trust of flimsy barriers, trusting in blind faith that they won't be targeted.

Right alongside the rise of software that makes our life and work easier than ever, the tools cybercriminals use have advanced as well, enabling hackers to penetrate precious networks of data with minimal effort. What used to take thousands of lines of code now takes a couple of clicks. According to IBM's 2016 Cyber Security Intelligence Index, 60% of the time it's not some fancy tool that allows criminals to circumvent your defenses — it's your employees letting them in.

No matter how impenetrable you may imagine your security measures are,

they'll be rendered useless if a hapless member of your team clicks the wrong file and opens the floodgates. When it comes to cyber security, your biggest vulnerability isn't your antivirus — it's your poorly trained employees. Here are four ways to prevent them from slipping up and opening your business up to attack.

1. STRONGER PASSWORDS

This may seem like a no-brainer, but it might not be the case. According to a 2015 survey conducted by TeleSign, close to 75% of consumers use duplicate passwords in their online activity. Twenty-one percent of them use passwords more than a decade old, 47% have been using the same password for five years and a whopping 54% use the same five passwords across an entire lifetime online.

As a business owner, these numbers shouldn't just make you chuckle — they should make you mad.

It may be that the entirety of your company's data, everything you've worked so hard to build over years of blood, sweat and tears, could be guarded behind a password as simple as "123456."

Make sure you train your employees on safe password practices. That means mandatory password changes to key business accounts every few months, each of them containing letters, numbers and symbols, preferably without any real words at all. It's a small change, but it can drastically increase your odds against data breaches.

2. MAKE CYBER SECURITY PART OF YOUR COMPANY POLICY

If your business is going to survive a digital onslaught, safe online practices for your employees need to be more than a recommendation. They need to be mandatory company policies. Every new and existing employee needs to know what's expected of them and what the consequences will be if they deviate from guidelines. For example, when an update comes through for a key piece of software, it needs to be installed immediately. Have a set procedure in place for them to follow if they encounter a suspicious e-mail or potentially malicious link. These and other practices, when set in stone, ensure that employees remain personally invested in protecting your company.

3. CONDUCT A SECURITY AUDIT

The best way to suss out any employee vulnerabilities, though, will always be to do a thorough security audit of all your systems. This means investigating the hardware and software you're using on a daily basis, sure, but most importantly, you need to analyze the habits of your

personnel and whether or not they're complying with your high standards of cyber security.

4. TRAIN YOUR PEOPLE

As they say, forewarned is forearmed. This is never truer than when defending your business from data breaches. With comprehensive cyber security awareness training, outlining everything from the biggest digital threats to post-breach best practices, you can turn your biggest security liability into your greatest defense. If employees know the ins and outs of hackers' tricks, it becomes exponentially more difficult for hackers to trick them and find a way into your network.

With all four of these steps, it can be difficult to determine just how to implement these policies within your organization — much less what should be included — but luckily, we can help. Contact us to find out how we can help you put a strong data security employee training program in place and patch any holes in your barriers before they become an issue.

Refer-a-Friend and Get Free Gifts!

We love having customers like you and honestly, we wish we had more just like you! So, we are doing an ongoing "Refer-a-Friend" event.

Refer any company with 5 or more computers to our office to receive a FREE Computer Network Assessment (a \$300 value). Once we've completed our initial appointment with your referral, we'll send you a **\$50 Amazon gift card**.

Think of it as a small "Thank You" for thinking of us. As an added bonus, if they join and become a client of ours, we will send you a **\$500 Amazon Gift Card** for introducing your friend to us.

Simply call us (401-684-3036), e-mail us (support@ITsupportRI.com) or visit www.ITsupportRI.com/referral and send us their contact information today!

Technology Spotlight: Ring Video Doorbell Pro

Technology has seamlessly integrated itself into every aspect of our lives. There's a variety of smart home devices to help make our lives easier and more secure.

Even doorbells, like Ring's Video Doorbell Pro, received the smart home upgrade.

The Ring Video Doorbell Pro is a hybrid – part doorbell and part security camera. The Video Doorbell Pro records video at 1080p HD quality and has a 160-degree field of view. It also utilizes three infrared LED lights for night vision recording of up to 30 feet. The doorbell also has a motion sensor, a microphone, and a speaker, allowing for two-way audio. It can be hooked up to your existing doorbell wiring and connected to your home Wi-Fi.

Not only does the Video Doorbell Pro provide your home with increased security, it also has extra curb appeal. The Ring Pro is an ultra-slim design, unlike other bulky smart doorbells. It comes with four interchangeable faceplates (black, bronze, nickel, and white) to match your home's exterior.

If you want to view, share, or download any recording, you need to subscribe to a service plan. The Protect Basic plan is \$3 per month and gives you 60 days of cloud storage per camera and full access to your videos.

The new Video Doorbell Pro is Ring's most advanced doorbell yet. The doorbell is also compatible with iOS, Android, Mac, and Windows 10 devices. You can use your smartphone, tablet or computer to instantly communicate with whoever is at your door any time of the day!

You can purchase the Ring Video Doorbell Pro on [Amazon](https://www.amazon.com), starting at \$249.00

7 Ways To Make Your Business Money While You Sleep

Think about the way your business runs. You attract prospective clients, convert them to customers, collect the money, cultivate repeat business and encourage customers to refer other prospective clients. While each of these steps entails specific challenges, one of your main goals as an entrepreneur should be to automate as many of these steps as possible. This way, you can generate income while you sleep.

Here are a few key ways to implement systems that perpetuate your business without your involvement.

1. MAKE YOURSELF INTO A PRODUCT.

Once you've found success, you should look for opportunities to promote yourself as a brand. Position yourself as the authority in your niche and develop products like videos or books that share your secrets to success.

2. DO FEWER THINGS.

It's impossible to automate aspects of your business if you insist on doing everything yourself. You need to train your staff to handle certain aspects of your business.

The best way to do this is to simplify your output. Look at McDonald's. They do basically five things: burgers, fries, chicken, salad, and soda. They package these things differently and sell them in different combinations, but the simplicity is what allows them to reproduce the menu in locations all over the world. Identify your strengths, streamline your offerings, and focus on the items you can train your staff to replicate.

3. CREATE CONTINUITY.

Billing for each service or product you supply is volatile, because both your revenue and your client's expenses vary wildly. Instead, consider selling a subscription at a flat rate – with maximum quality and minimal hassle, it's the ultimate win-win for both you and your clients.

4. SELL YOUR SYSTEM CHEAP AND MAKE MONEY ON THE REFILLS.

We're talking primarily about businesses that produce tangible goods here. Think Keurig coffee makers and HP printers. In these cases, once consumers own your brand of device, you're guaranteed their continued business.

5. BECOME THE MIDDLEMAN.

Find a way to broker business and let other folks do the work for you. Becoming an Amazon affiliate is a great example. You link to their site, they sell, and you make money.

6. BECOME A TEACHER.

Look at your business and find ways to teach other entrepreneurs how to acquire the skills necessary for opening their own business modeled on yours. It's another way to position yourself as an authority, enhancing the credibility of your brand, and it can be a great way to cash in on the educational aspects of your expertise.

7. BECOME AN INVESTOR.

Money makes money, but it's important that you're careful about how you invest as an entrepreneur. Look at your clients and assess their needs. Find a company (in addition to yours) that addresses those needs and invest there. This way, you forge a bond between your company and another, but you cement your position as the business that caters to your clients' desires.

MIKE MICHALOWICZ (pronounced mi-KAL-o-wits) started his first business at the age of 24, moving his young family to the only safe place he could afford – a retirement building. With no experience, no contacts and no savings, he systematically bootstrapped a multimillion-dollar business. Then he did it again. And again. Now he is doing it for other entrepreneurs. Mike is the CEO of Provendus Group. He is also a former small-business columnist for The Wall Street Journal; MSNBC's business makeover expert; a keynote speaker on entrepreneurship; and the author of the cult classic book The Toilet Paper Entrepreneur. His newest book, The Pumpkin Plan, has already been called "the next E-Myth!" For more information, visit www.mikemichalowicz.com.

Expert of the Month: The Team at Drenzo Towing & Recovery

Drenzo Towing & Recovery is more than just a towing company; they're also your solution for all equipment moves, accident recoveries, and road service! When current owner John Drenzo Jr. founded the company in 1999, it was just himself and a couple of trucks. Today, Drenzo is one of the largest towing and recovery companies in central New England. John's original fleet of a few trucks has grown into a fleet of 30 that can meet all your towing needs.

At Drenzo Towing & Recovery, they offer more than just towing. In fact, the company's services can be broken down into four categories: light towing, heavy towing and recovery operations, transportation services, and heavy-duty truck repairs.

What makes Drenzo Towing & Recovery different from other companies? They're mindful and respectful of their customers. Most of the time, they're a third-party company, so they work hard to ensure that their customers never look bad. For example, there was a tractor trailer that failed inspection and was put out of service. When Drenzo Towing & Recovery went to tow the truck, they realized that the truck's delivery was going to the local BJ's Distribution Center. Typically, they leave the trailer behind, but because the load was local, they sprang into action! They towed the tractor back to the shop for repairs, and then sent one of their own trucks to deliver the shipment on time.

They work with the Worcester County Sheriff's Department, Worcester, Millbury-Sutton, and Northbridge Police, the Greater Blackstone Valley Local Police, and the Massachusetts State Police. Because they work so closely with the surrounding police, Drenzo Towing & Recovery prides themselves on their diligence when it comes to maintaining these strict standards and performing full screenings and background checks of their employees.

John Drenzo Jr. is also very generous and charitable with his company, trucks, and time. They regularly participate in events like Touch-A-Truck and various parades, where his trucks proudly display the American flag.

How does the team at Drenzo Towing & Recovery feel about working with us? HR Administrator Jim Cahill says they love everything. He praises us, saying "Your customer service is outstanding. I constantly hear our employees saying how nice everybody is, how polite and responsive they are, and how understanding the technicians are." Jim has dealt with a lot of IT companies and he knows that our "response time is unrivaled." While Jim had plenty of nice things to say, he concluded stating that, "whatever you have going on operationally, it's working."

The best way to reach Drenzo Towing & Recovery is to call them at 508-865-1802. A dispatcher will help direct your call to the right person. Remember, if you need a tow, call Drenzo!

5 Daily Habits That Are Killing Your Work-Life Balance And How To Fix Them

Being passionate and dedicated to the work you do is a surefire path to success. But in the lives of many driven people, there comes a time when work begins to overtake other aspects of your life that are vital to living a full, happy, healthy existence. Here are five habits you're probably practicing that are preventing you from achieving that fabled work-life balance.

1. SUPERHERO SYNDROME—Just because you're a top performer doesn't mean you should act the hero. Ruthlessly prune extra work to all but the most critical of projects. As they say, there will always be more work – don't let it take over every moment of your day.

2. ARTIFICIAL URGENCY—Create very specific ways to determine the actual priority of each project, markers that indicate whether taking a few extra days on something will actually affect your business.

3. UNDEFINED BOUNDARIES—When we take work home, we may feel like we're staying on top of everything, but in fact, without strict compartmentalization between work and life, neither is able to reach the heights that true focus will deliver. Draw a line in the sand and stick to it.

4. NO BUFFER—In order to even out your workload, you need to leave some space in your schedule for unanticipated events. One way to fix this is to create a 50% extra window of time for everything you need to accomplish.

5. CHASING TIME—It's easy to constantly focus on what's next, feeling as if you're always behind the ball. But it's vital that you commit to living in the moment as much as possible. And whatever you do, don't forget that your mental health is just as important as that pile of work you have waiting on your desk.
