4 Ways to Keep Your Team Inspired

Entrepreneurs and business leaders often find that motivating team members is challenging. One reason is because leaders seldom lack self-motivation. It's so second nature to them that they get frustrated when a team member doesn't appear to have the same level of drive and ambition.

One of the most frequently asked questions I hear from business leaders is, "How can I motivate my team?" Imagine their surprise when I tell them, "You can't."

Leaders need to stop looking for ways to **motivate**, and instead find ways to **inspire** team members to seek out their own motivation.

Business leaders must understand that team members will not always share their outlook, passion or motivation. So instead of forcing your will (and drive) on others, use these four approaches to inspire motivation in your team:

1. **Lead by example**
2. **Honesty is the best policy**
3. **It's about balance**
4. **Expect results and celebrate victories**

When you've got a team to lead, you have to step it up and show them how it's done. We all know how infectious positive energy can be. When you live by example and spread it around, it will become embedded in your company culture. You'll see the results every day and, as an added benefit, you'll create your next group of leaders.
